

Greenhouse Gas Emissions Verification Report

To: FamilyMart Co., Ltd.

August 28, 2023

Japan Audit and Certification Organization
for Environment and Quality (JACO)

2-2-19 Akasaka Minato-ku, Tokyo, Japan

President

A handwritten signature in black ink, appearing to read "H. Onodera", is written over a horizontal line.

Japan Audit and Certification Organization for Environment and Quality (JACO) has been engaged by FamilyMart Co., Ltd. (hereinafter referred to as "the Organization") to conduct independent verification of its GHG emissions data prepared under the responsibility of the Organization.

1. Purpose and scope of verification

With regard to GHG emissions information for the fiscal year 2022 (from March 1, 2022 to February 28, 2023), the verification was conducted.

- 1) Scope 1 and Scope 2 Greenhouse gas emissions
 - CO₂ emissions from energy consumption by business activities at the Organization's offices (headquarters and sales offices)
 - Greenhouse gas emissions from the Organization's stores (company-owned and franchised)
- 2) Scope 3 Greenhouse gas emissions as defined by the Organization (Category 1-7 and 11-12)

The Organization revised a part of the data that was used for the verification in response to the verification findings. The responsibility for preparing a calculation report and reporting GHG emissions is in the Organization and our responsibility is to express an opinion on GHG emissions stated in the calculation report by independent standpoint.

2. Verification procedure

JACO conducted verification in accordance with ISO 14064-3:2019, "Greenhouse gases - Part 3: Specification with guidance for the verification and validation of greenhouse gas statements." We conducted the following activities as part of limited assurance:

- Hearing or document inquiries to the Organization's officials who are responsible for identifying and accounting greenhouse gas emissions;
- Evaluation of the application of the accounting criteria, the method of data measurement, the assumptions adopted by the Organization as well as its basis, and the description of the GHG statement related to the information (data) used to determine the GHG emissions; and
- Verification by sampling in order to confirm accuracy of GHG emissions.

3. Conclusion

Based on the procedures we have performed and evidence we have obtained, nothing has come to our attention that causes us to believe that the Organization's GHG statements:

- are not materially accurate and are not a fair representation of the GHG emissions as per the scope of work; and
- are not prepared in accordance with the methodology implemented by the Organization.

Verified greenhouse gas emissions

Scope 1: 60,083 tCO₂e, Scope 2: 1,011,496 tCO₂e, Scope 3: 5,403,134 tCO₂e

The Organization and JACO verification team did not have any specific conflicts of interest and carried out the verification on an independent basis.
